– Sharie, Organizational Studies

## FOCUS ON STUDENT SUCCESS

Saint Louis University's School for Professional Studies provides resources designed to support working adults.

### Personalized Support

From their first engagement, students are assigned an academic coach to guide them through the enrollment process, serve as their one-stop shop for navigating University processes, and follow the student's journey, providing support and encouragement every step of the way.

### Preparing for Success

A self-paced course prepares students for an online college experience. This course is designed to help students develop the skills they need to succeed in a postsecondary environment including writing readiness, study skills, and time management skills.

### Readiness Assessment

An individual assessment allows students to determine their readiness to complete online coursework. If we find a student is not appropriately prepared for online coursework, an academic coach will help the student become prepared by providing individualized support as well as additional resources.

### Virtual Tutoring

On-demand virtual tutoring is available to SLU Online students. Tutoring is available for math, science, computers and technology, reading and writing. Within 24 hours, expert writing tutors can offer valuable feedback on any assignment.
