Earn your artificial intelligence master's degree online

The 33-credit Master of Professional Studies in Artificial Intelligence, offered entirely online through Penn State World Campus, presents the opportunity to receive a deep education in AI and machine learning.

You can:

- › learn about supervised learning, unsupervised learning, and reinforcement learning — algorithms used to evaluate data
- › study natural language processing — how machines comprehend and synthesize speech and text
- › understand machine vision — how computers can perceive and analyze a visual environment
